Fair Value Gaps

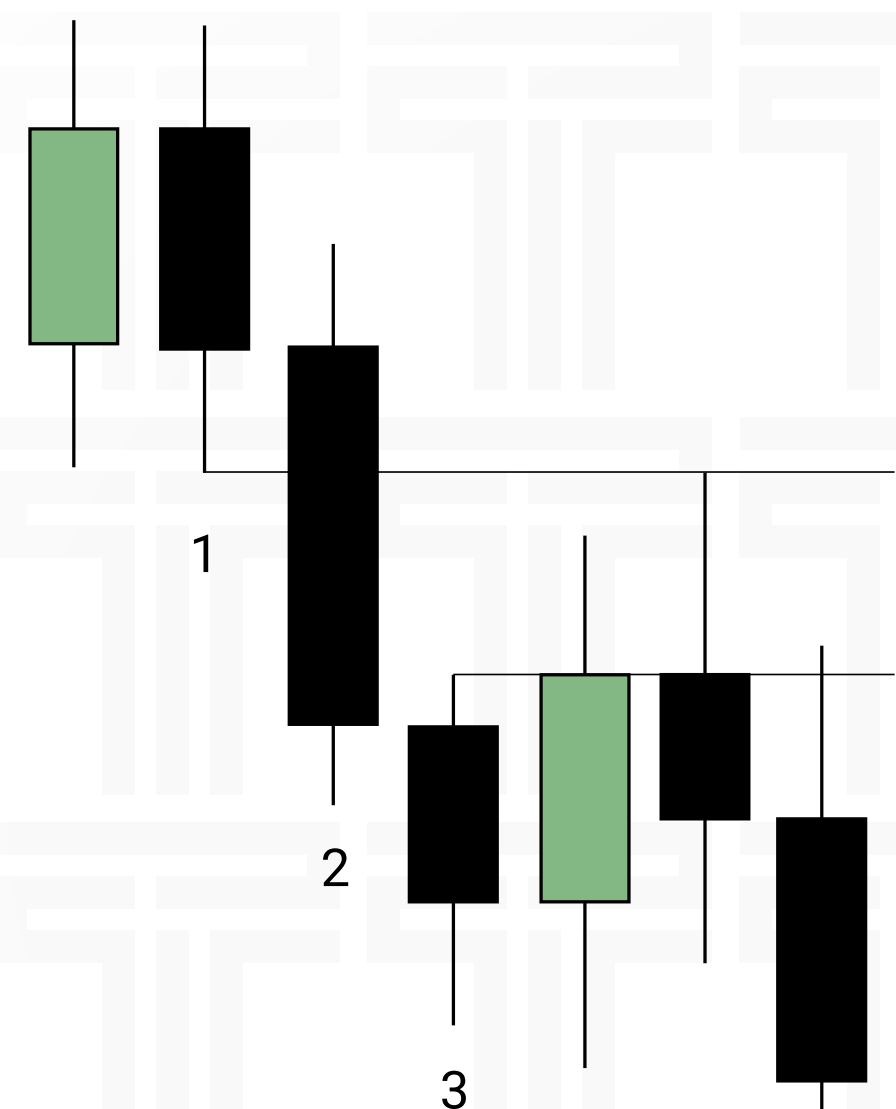

Fair value gaps (FVG) are a three-candlestick pattern where the high/low of the candle(1) does not overlap the low/high of candle(3).

The low of candle(1) does not overlap with the high of candle(3).

SIBI & BISI

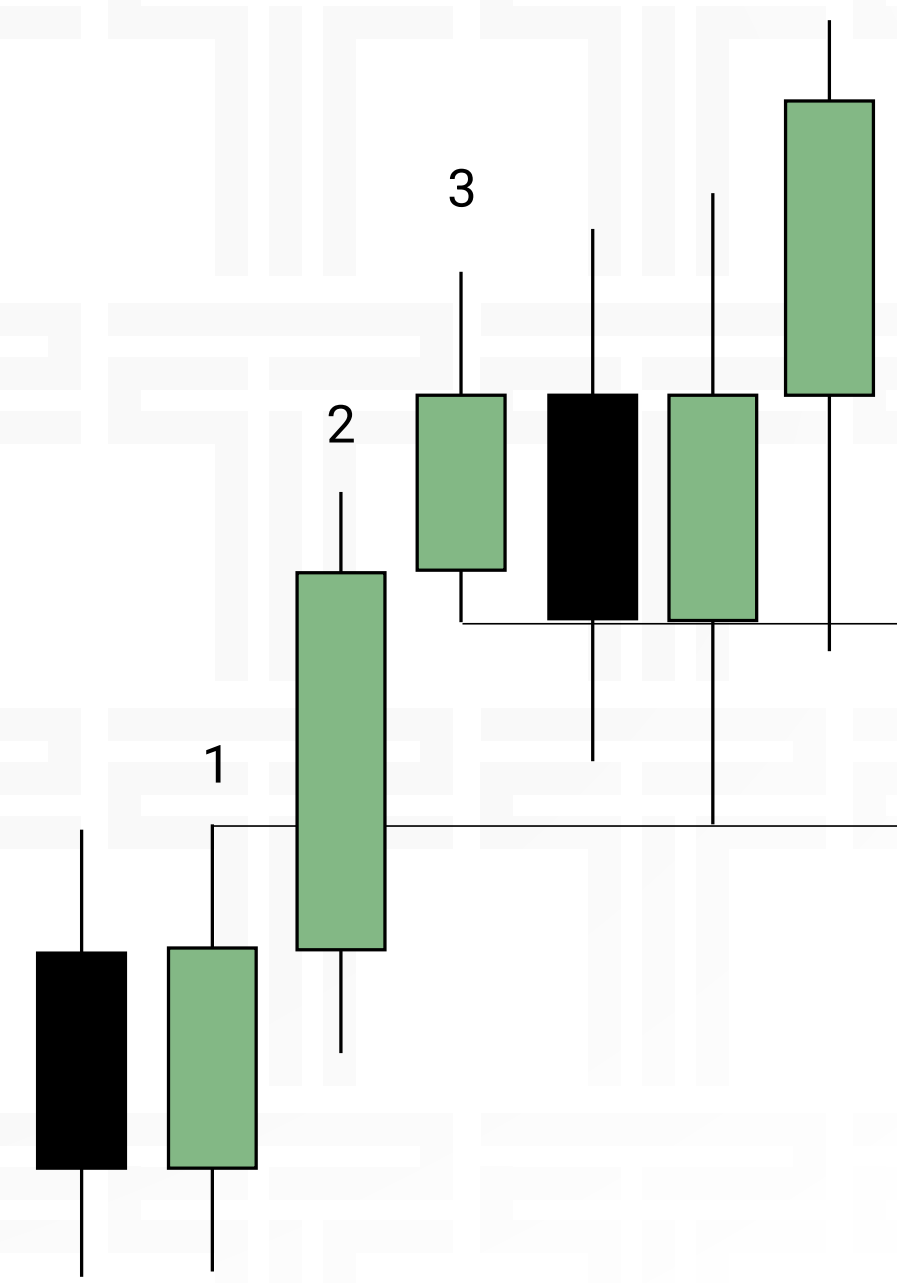

SIBI: Sellside imbalance buy-side inefficiency

This is a **bearish** FVG.

Price offered sellside and made an imbalance. This leaves buy-side inefficient.

Candle(1) low does not overlap with Candle(3) high.

BISI: Buy-side imbalance sell-side inefficiency

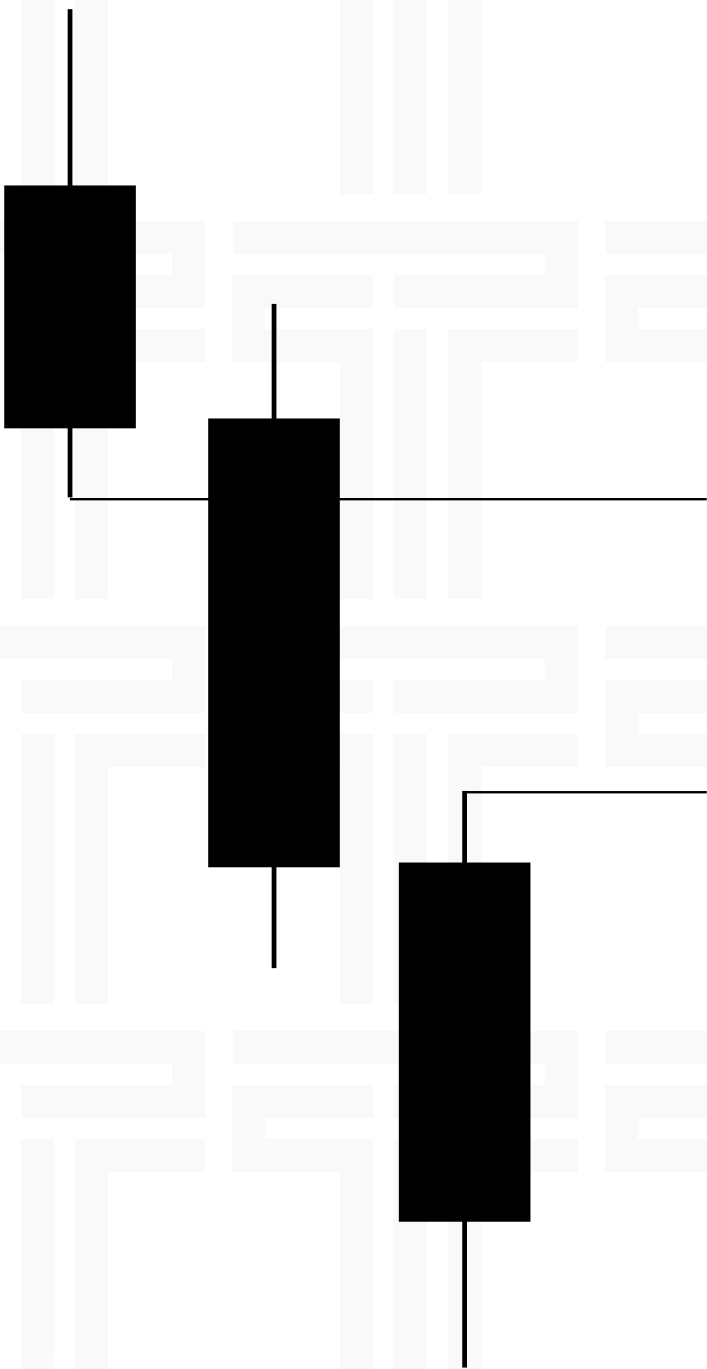

This is a **bullish** FVG.

Price offered buy-side and made an imbalance. This leaves sell-side inefficient.

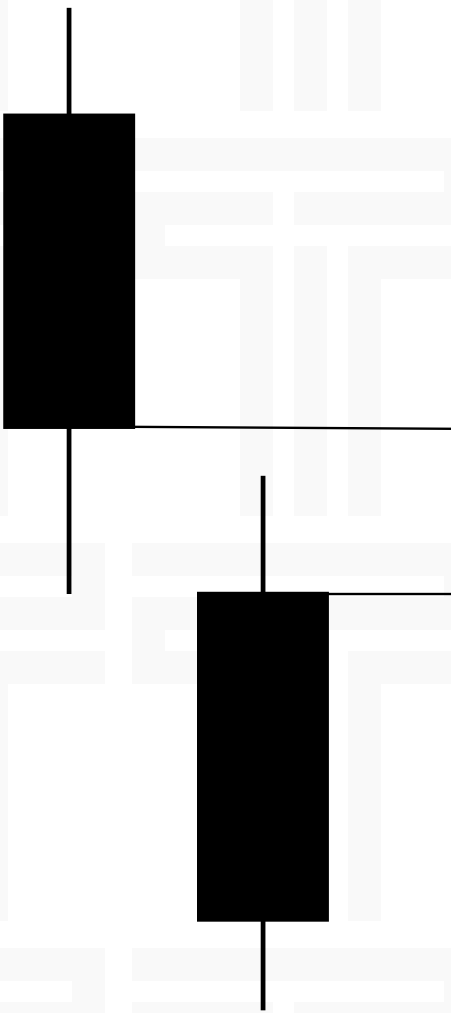

Candle(1) high does not overlap with Candle(3) low.
